Week 1 - Core - Worksheet | Unit Launch - Evaluating & Improving AI Models

Name: _____ **Class:** _____ **Date:** _____

Sort each example card into the correct column and give a reason.

My two questions

Write at least two questions about how AI outputs are made, judged or improved. Aim at least one at how we decide an output is good.

_____

_____

_____

_____

Sort it: output, judge or improve

Write each example in the right column and add one reason.

Example	Output / Way to judge / Way to improve	Reason
A finished Arabic-English translation		
Checking the translation for accuracy against the task		
Giving the model a clearer input, then re-testing		

Our safe-use charter

Write one responsible-use rule for the class and why it keeps us safe.

Exit ticket

Exit ticket - Name one example, say whether it is an output, a way to judge, or a way to improve a model, and explain why. Then write one question you still have.

_____

_____

Challenge (stretch)

Challenge - Pick a real UAE situation (for example a smart-parking app or an Arabic-English translator) and predict what a strong AI solution would need to get right. Name two performance criteria you would judge it against and one change you might make to improve it. This stretches toward the Proficient idea of connecting the unit to a real context and predicting what a strong solution needs.
