Week 3 - Core - Worksheet | AI Solution Design & Development - Designing & Building

Name: _____ **Class:** _____ **Date:** _____

Design your workflow

Fill each box for one specific task. Use only non-personal sample data in the input box.

Task (one sentence)	
Input (sample data)	
AI process step	
Output	
Check (against what?)	

Run and trace

Run one sample input through your workflow, then explain the reasoning behind the output you got.

_____

_____

_____

Verify-before-trust

Write where in your workflow you check the output, and one reason a confident output could still be wrong.

Exit ticket

In one sentence, name the specific task your workflow solves and explain the reasoning behind one step of its output.

_____

_____

Challenge (stretch)

Challenge (stretch): add a second step or tool to your workflow so it combines multiple steps (for example a translate step before the classify step). Draw the new order and explain why the order matters for the result.

_____

_____
